Roof Flashings

Flashings are used to offer water protection, while also providing a pleasing aesthetic touch for any roof design. Some of the many variants we offer include barge ends, apron flashings, box gutters and trim ends. These designs often come with the choice of two different varieties; curved or the traditional square shaped flashings.

Types of Flashing

Barge Flashing – a corner flashing that elegantly finishes off your roof. These are often made with a V bead or bird's beak at the bottom edge.

Box gutter – a rectangular design used within the boundaries of your roof. These are available with infold, outfold, splashback and squashfold edges

Apron Flashings – a folded piece of metal which is used to stop water from penetrating the space where a roof intersects with the vertical portion of the house.

Other types include but are not limited to:

- Industrial Eave Gutters
- Valley Gutters
- Trough Gutters
- Corner Flashings
- Foot Moulds
- Pole Plate Flashings
- Sill Flashings

Specifications

Here are some examples of FNW's extensive range of flashings.

Flashings are available either tapered or straight and in lengths of up to 8 metres. Also available is the popular Barge flashing – made to size; Barge flashing is suitable to finish off the roof sheeting at Barge Boards, providing a watertight and neat finish to the roof. Flashings can be made for any purpose/size and application. Minimum of 1 metre will be charged.

Minimum flashing fold is 10mm. Safety edge = 2 Bends. Maximum flashing length is 8 LM. Flashings under 1 LM will be charged at a minimum of 1 LM. Standard bend tolerance is $\pm 2\text{mm}$. Please advise if flashing length is critical.

COLOUR YOUR FLASHING

Of all the elements of design, colour is the most powerful and personal. The COLORBOND® steel colour palette makes it easy to express yourself with colour. Steeline FNW provides you with a huge colour range to choose from which have been inspired by Australia's own magnificent backyard.

The COLORBOND® steel colour swatches in this brochure have been reproduced to represent actual product colours as accurately as possible. However we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones. COLORBOND® and ® colour names are registered trade marks of BlueScope Steel Limited. ™ colour names are trade marks of BlueScope Steel Limited. ABN 16 000 011 058. All rights reserved.
